

CURRICULUM VITAE (CV) WRITING GUIDE

PURPOSE OF A CURRICULUM VITAE

The purpose of a curriculum vitae, or CV as it is commonly referred, is similar to that of a resume. It gives an employer a quick overview of your skills and experience so that he or she can determine if there is potential for a successful candidate/position match. Where a resume and a curriculum vitae differ is their use, format, and length. CVs are commonly used when applying for jobs in academia, research, medicine, science, and for higher level government positions. It is also used for applications to graduate school. Like a resume, you want your CV to be tailored to the job or graduate program for which you are applying. However, a CV is typically longer than a resume and can include information that you would not always put on a resume, such as research experience, publications, and professional presentations. If you do not have experience in these additional areas, your CV will most likely look like a standard resume. This is common for undergraduate students.

This guide will provide you with many tips and examples to help you create a CV that fits these guidelines; however it is always important to have others look over your CV, such as a professional like one of our staff members in Career Services, to get another perspective and to catch any mistakes that you might have missed.

BASIC REQUIREMENTS FOR A CURRICULUM VITAE

There is no specific format or requirement for a CV. It is a good idea to talk to a professional in the field you are entering, such as a faculty member at UCO, to help you determine what format is most appropriate. However, you will still want to stick to the basic guidelines for a resume, such as utilizing white space, avoiding paragraphs, keeping statements concise, being consistent with format, etc. These guidelines can be reviewed in our “Resume Writing Guide” available to you on our website or as a hard copy in our office. One exception to the resume recommendations is the length. Remember that a vitae can be longer than a resume so you do not have to stick to the one page rule.

POSSIBLE SECTION HEADINGS

There are many options for what sections to include on your CV. The following are some examples of what you might include. Please note that some sections are absolutely required regardless of what style of CV you choose:

Contact Information (required): Include name, address, phone number and e-mail address. You may also include a professional website or networking website such as LinkedIn. Do not use Facebook or other social media sites you have for personal use.

Objective (optional): This section should only include the position and/or career field in which you are seeking employment. Do not use this section to summarize your career goals.

Education (required): Only include schools from which you have received a professional degree or certificate, as well as, any schools you are currently attending. Do not include high school information. Write out degree title(s), name of school, city, state and graduation date or expected graduation date. If you have a thesis or dissertation, you can list the title of it in this section. GPA is optional for most careers. You can also include your major GPA instead of your cumulative GPA, if it is higher. When deciding if you should include your GPA, it is best to only include it if it is over a 3.0; however, some employers/industries may require that you include your GPA regardless of what it is.

Licensure and Certifications (optional): Include title of licenses/certifications and dates received.

Experience (required): List any work, volunteer or internship experiences related to what you are seeking. You should include your position title, company/organization name, city, state and dates you held the position. Underneath this information, you should list the most relevant, main responsibilities held in each position using a single column, bullet point format. If you do not have any experience that would be considered related, you can just include information from your last few jobs (typically 5-10 years). On a CV, you might also break your experience up into different types, such as **Teaching Experience** or **Research Experience**. Other possible titles for this section are: **Work Experience, Professional Experience, Related Experience, Relevant Experience**

Publications (optional): Include articles, books or chapters in books, research reports or any other publication you have authored or co-authored. Include items that have been published, works in progress, and/or items that have been submitted. This section should be formatted like a bibliographic citation. It is important to format it by what is appropriate in your academic discipline/field. This section may be combined with presentations.

Presentations (optional): Give titles of professional presentations using the format that is appropriate to your particular academic discipline. This will typically include the name of the event, location, and dates. This section may be included with publications.

Grants and Fellowships (optional): Include name of grant, title or purpose of research project, name of granting agency, and date received.

Research (optional): This will be formatted similarly to your experience section. You want to make sure to include where you did the research and what your role was. Then describe what you did as part of the research project. This may also be called: **Research Experience**

Activities and Honors (optional): Include professional, school or community related organizations, awards and scholarships. You can combine these in one section or create multiple sections for each type of activity. You should choose items that directly relate to your career objective and/or demonstrate leadership. Volunteer work can be included in your experience section instead of activities, if it is related. Follow formatting as explained above for that section. Other titles for this section could be: **Organizational Involvement, Campus and Community Involvement, Professional Memberships, Volunteer Experience, Volunteerism, Leadership**

Skills (optional): Summarize skills you have obtained through your education, work experience, activities or volunteerism that relate to your objective. Be specific and write in statement form. This section is listed after your objective or in place of the objective. Other titles used for this section include: **Profile, Skills Summary, Qualifications, Summary of Qualifications, Professional Summary**

Work History (optional; only use as additional work information after your experience section): Create a list of jobs that provides evidence for a consistent work history. List your position, name of employer, city and state and dates held. You typically will not list job responsibilities in your work history. Other titles include: **Additional Experience, Other Experience**

BUDDY BRONCHO

100 N. University Dr.
Edmond, OK 73034
405-555-0000
bbroncho@uco.edu

SKILLS SUMMARY

- Proficient in the use of molecular software such as FSTAT, MEGA6, and Arlequin and statistical software such as STAT for ANOVA, t-tests, and F-tests
- Experienced with laboratory techniques such as differential staining, DNA extraction, enzymatic assays, bacterial culture, titration, spectrophotometry, and gel electrophoresis
